

WINTER WEATHER REMINDER FOR TORNADO DAMAGED PROPERTIES

Winter is approaching Marshalltown quickly, be prepared. If your property was affected by the tornado it is time to think about freezing pipes in your unoccupied buildings or homes. If there is no heat and the water is not turned off at the curb stop, most likely things will freeze and burst which will cause more damage and large bills. To turn the water off you need to call the Marshalltown Water Works at (641-753-7913) to set an appointment to meet you at your property.
